APPROVAL OF STATE ENGINEER				
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the				
following limitations and conditions: This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of cattle served from the waters of this				
source. It is further understood that this right must allow for a				
reasonable lowering of the static water level at permittee's well due				
to any other ground water development in the area. The well shall be				
equipped with a 2-inch opening and an air line for measuring depth to				
water. If the well is flowing, a valve must be installed and main-				
tained to prevent waste. The State retains the right to regulate the				
use of the water herein granted at any and all times but does not take				
responsibility for the use of the Federal range.				

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and				
not to exceed 0.03 cubic feet per second or sufficient water				
to water 1000 head of cattle.				
Actual construction work shall begin on or before September 2, 1964				
Proof of commencement of work shall be filed before. October 2, 1964				
Work must be prosecuted with reasonable diligence and be completed on or before September 2, 1965				
Proof of completion of work shall be filed before October 2, 1965				
Application of water to beneficial use shall be made on or before. September 2, 1966				
Proof of the application of water to beneficial use shall be filed on or before				
Map in support of proof of beneficial use shall be filed on or before
